FOR IMMEDIATE RELEASE

THE SAFE SHOP RELEASE NEW HIGH SECURITY LAPTOP SAFE

8 September 2005

Leading UK safe retailer The Safe Shop have announced the release of the Alpha A210BE, a safe specifically designed to store a laptop computer.

Recent UK police figures show that over 34,000 laptops are reported stolen each year. It's difficult to put a price on laptops which not only are valuable personal assets but also often contain corporate data or other sensitive information. With identity theft also on the increase it has never been more important to make sure that laptop computers are safely protected.

The Alpha A210BE is a safe designed to do just that. Costing £119 including delivery, it is a modern and attractive safe which would be suitable for personal or business use, finished in black scratch-resistant paint. It has a high security electronic lock including LCD, and is programmable with an easy to remember, but hard to guess combination. Its impenetrable defences include high security 2-way motorized bolt work, a 5mm steel door and 3mm solid steel body. Drill resistant plates protect the lock mechanism and bolt work.
