Trident - up to £150,000 cash protection, fire protection and explosives protection

Retailers, Banks and Commercial Businesses are constantly reviewing the secure storage of cash within their operations. Faced with increasing threats to security, organisations are constantly striving for products of the highest technical specification. The new Trident safe from Chubb Safes is the optimum solution. Constructed from the highest specification materials, this graded safe uniquely offers certified high security protection against explosives, theft and fire. Additional features include European standard certification, high security EN1300 locking, anti-explosive boltwork protection and full content access.

With the integration of explosives protection, its no surprise that the Trident is "the optimum safe solution from the Chubb Safes product range"...

QUALITY FEATURES:

Burglary protection

Tested and certified by ECB.S to the European standard EN1143-1

Fire protection

Trident offers 60 minutes fire protection for documents. Tested and certified by SP to NT Fire 017-60P.

Explosives protection

Tested and certified by ECB.S to the European standard EN1143-1. In addition to the standard physical EN 1143-1 certification, the new Trident range has the additional EX accreditation. This means the safe is tested for resistance against explosives.

Manufacture

Manufactured to an ISO9002 accredited quality assured process.

Locking

Grades IV-V are supplied with two key locking EN1300 Grade B locks fitted as standard. For grade VI, two key locking EN1300 Grade C locks are fitted as standard. As an option for all grades, a third lock can be fitted upon special request. Keylocks are solid keys. Loose bitted keys are supplied at an extra cost.

Construction

Constructed from jointless barrier materials encapsulated in an outer and inner steel body for greater protection against attack. Differing security levels are achieved within the Trident range by the use of increasingly resilient barrier materials. The doors are constructed using the same barrier materials together with the inclusion of additional protection over the locking areas.

Boltwork

Four way engagement with 32mm moving bolts extending from 3 sides of the door that secure the door effectively into the body. With up to 8 bolts, the 3 way moving boltwork provides effective defense against attacks. Specific anti-explosive devices protect the boltwork against explosion break-in.

Base fixing

Safes below 1000kg (e.g. all safes up to size 210) must be fixed to comply with certification guidelines. All such safes are supplied with one fixing bolt. All safes offer 6 possible fixing holes: 5 in their base and 1 in their back.

Cash rating

Naturally, the cash rating increases with the grade of Trident. The recommended cash ratings are £60,000 (grade IV), £100,000 (grade V) and £150,000 (grade VI).

Jewellery Rating

As a general rule, the cash rating is multiplied by a factor of 10 for jewellery so a Trident Grade IV with a cash rating of £60,000 will allow for storing jewellery worth £600,000. Always consult your Insurer for confirmation.

DESIGN FEATURES:

Size

Available in six sizes within each grade.

Finish

Supplied in a contemporary black finish.

WORKING WITH YOU:

Planning & Installation - The Complete Service

Prior to making a purchase, Gunnebo will guide you through the selection process. This process begins by carefully identifying your security objectives. Once complete, a security solution will be offered together with a free comprehensive installation survey. Gunnebo will then agree with you a flexible installation schedule. The flexibility of the installation process is evidence of Gunnebo commitment towards ensuring the cost and time efficient completion of your purchase.

Gunnebo products are delivered and installed by trained installers. Whatever the delivery environment (e.g. large bank or small office) you can be assured that the installers will take the greatest care. We are also focused on making sure the service on offer is achievable, to the highest standards of workmanship and is promptly completed within the contracted timescales.

Trident

up to £150,000 cash protection,
fire protection and explosives protection

CUSTOMISATION:

The Trident range is the most customisable product in the Gunnebo portfolio. Dependant on grade and size, the safe can have a different lock (e.g. electronic) or fitting (e.g. cupboard) to meet your customer requirements. For further details and technical information regarding customisation please feel free to contact Gunnebo or your local authorised dealer. As always, Gunnebo will endeavour to provide a customisation solution which meets your expectations.
